23H0002C, Des 2000030

Hi Nathan,

Yes, would you please send me a supplemental proposal and reasoning.

I will include it.

Thanks,
Liz

Subject: RE: INDOT US 33, DES 2000030 - outfall mapping

Derek,

I've reviewed the changes to drainage layouts and I don't have any major comments. As expected, the most northern part of the project area will no longer drain to the BMP basin. We'll update the modeling to reflect that, but I don't think we'll have any design changes with the basin.

Revised ditching looks like it will have adequate freeboard.

There may be issues with spread where curb is now proposed due to minimal shoulder, but we'll have to run the calculations and see how many inlets are needed.

Liz, this new layout requires hydraulic design of two new storm sewer systems. I believe you said last week you were still working on processing the other supplement requests. Would it be possible to add in this additional design work. The design won't need INDOT Hydraulics approval, but we'd need to compile calculations with a short report.

Thanks,

Nathan Beach, PE, CFM

Nathan,

I’ve further developed the drainage revisions. Take a look at the markup PDF attached to this email. Please let me know by the end of this week whether you have any concerns. I plan to get started on updating the corridor model to reflect these changes next week.

Thanks!

Hey Nathan,

Sorry this has taken a minute, but I was finally able to do a bit of redesigning to resolve the noncompliant ditch foreslopes/backslopes. Here is what I'm thinking (attached).

Please give me some soft feedback when you can. I can adjust as needed, and I don't want to go any further with finalizing things into print before putting it in front of you.

Let me know if you have any questions/comments.

Thanks,

EXTERNAL SENDER STOP.THINK.QUESTION If this is unexpected, verify before you click links or open attachments.

Hello Derek,

Sorry for the delay on this. We discussed the design changes required on Des. 2000030 due to ditch grading requirements and ROW issues before the holidays last year. After that meeting, I was supposed to send mapping of the existing outfall locations along the project corridor to you to assist with these design changes. Attached to this email are figures that show and describe the outfall locations and a .zip file that contains a shapefile and .kmz file of the locations.

If you have any questions, please let me know. Or, if we need another meeting to discuss design changes, we can find a time.

Thank you,

Nathan Beach, PE, CFM
